

Invitation to

Boosting SME internationalisation:

Everywhere International SMEs (EIS) project - Final Conference

The partners involved in the Everywhere International SMEs (EIS) project, invites you to its online final conference to share with you insights from local and regional business support organisations, and offer ideas on how best to support SMEs in going international.

The conference will take place online on **Thursday, 10 September from 14.00 until 15.30 CET (13.00-14.30 GMT+1)**.

As a result of the four-year project, concrete examples of measures taken by EIS regions and their local business support organisations will be presented by the participating seven regions with an introductory presentation by Interreg Europe's Joint Secretariat. The event will also provide an opportunity to share valuable experiences of working on SME internationalisation from policy and practitioner perspectives.

We especially look forward to welcome people and organisations engaged in local and regional policy towards enterprises and business support organisations.

To sign up follow this link:
