WHAT IS NETWORKING?

Networking can be defined as developing business and friendship relationships with professionals, employees and/or potential customers for mutual benefit. The main purpose of Networking, which can also be considered as "expanding the business network", is to introduce yourself and your business to other people in your business life and to make these people your customers in the long run.

Networking means thinking outside the box.

You need to cross your limits!

**The vital role of "NETWORK"
in the entrepreneurship
ecosystem!!!**

**Networking gives you access to opportunities
you might not find on your own.**

**Your network has the potential to provide you
with information on different fields, tips on what
potential employers are looking for, and advice
on how to grow professionally.**
